# Classic DrainTop

## Advanced Laboratory Liquid Control Systems

Differentiate your laboratory case work with Classic DrainTops. Laboratory Tops now offers this unique epoxy resin worksurface to improve performance in lab sink areas.

### Directional Containment

Advanced liquid control begins with the Classic DrainTop's raised outer marine edge. This integrally molded safety barrier surrounds the worksurface preventing most spills and splashes from overflowing onto lab techs, case work and lab flooring. The specialized DrainTop surface directs liquids toward the sink with a slight pitch. This increases the height of the containment barrier around the sink's splash zone.

### Raised Rib Drainboards

DrainTops incorporate Laboratory Tops' exclusive rolling rib drainboard design. These durable ribs elevate laboratory glassware above the worksurface which increases air flow in and around wet items and reduces drying times. The smooth rib surfaces are molded to eliminate absorption and ease clean ups. Thorough cleaning prevents residual chemicals from mixing in the sink area and reduces the staining typical with machined drain grooves. Combined with good housekeeping practices, the DrainTop can retain its good looks for the life of the lab!

## Elevated Fixtures

Faucets, eyewashes and other services can be mounted on the large elevated rear deck. Elevating fixtures above the wet area helps protect them against corrosive chemical and moisture damage and eliminates the possibility of standing water seeping into the sink cabinet through the fixture hole (please check gooseneck specs to ensure sink rim clearance).

## DropIn Sinks

LabTops® DropIn® Sinks with SolTra® Outlets complete the Classic DrainTop liquid control system. All sink rims, corners and outlet transitions are radiused and the basin is pitched toward the outlet to facilitate complete drainage. Many sink sizes and double sink combinations can be specified.

DrainTops are Available Exclusively from

 **LaboratoryTops, Inc.®**

## Classic DrainTop Sizes

Classic DrainTops are available to meet many standard size requirements. Back rails can be trimmed to accommodate additional worksurface dimensional requirements (see table below).

## Edge Options

Select DrainTops with either a 1/8" bevel or a 1/4" radius exposed edge. These attractive worksurfaces can be used throughout the lab at the end of islands, peninsulas and in wall runs in-line with other ClassicTops.

## DropIn® Sinks

Classic DrainTops are excellent platforms for LabTops' Epoxy Resin DropIn sinks. Any sink can be specified so long as the outer rim dimension plus the sink cutout's 1/8" [6mm] bevel fit into the DrainTop sink area. Double DropIns require a 1" [25mm] worksurface strip between the two installed sinks.

## Colors Options

Specify any of LabTops colors including Black Onyx, Platinum Gray, Pewter, Pearl, Pacific Blue and Forest Green. Many additional custom colors can be created on a special order basis.

## DrainTop Configurations

Center sink DrainTops with dual drainboards and single drainboard units with sinks offset to the left or right are available.

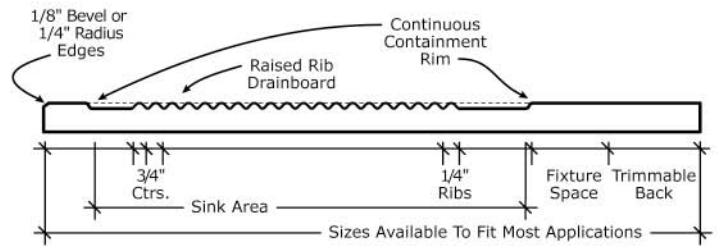

### Dual Drain Board DrainTops

Style No.	Sink Location	Exterior Dimensions (in)		Sink Area Dimensions (in)		Exterior Dimensions (mm)		Sink Area Dimensions (mm)	
		Length	Width	Length	Width	Length	Width	Length	Width
451	Center	54	26-30	30	18	1372	660-76	762	457
450	Center	60	26-30	30	18	1524	660-762	762	457
457	Center	66	27.5-32	30	18	1676	699-813	762	457
456	Center	72	27.5-32	38	20	1829	699-813	965	508

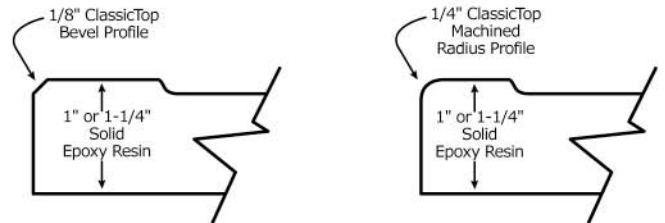

### Single Drain Board DrainTops

Style No.	Sink Location	Exterior Dimensions (in)		Sink Area Dimensions (in)		Exterior Dimensions (mm)		Sink Area Dimensions (mm)	
		Length	Width	Length	Width	Length	Width	Length	Width
454	Right	60	26 - 30	38	20	1524	660-762	965	508
455	Left	60	26 - 30	38	20	1524	660-762	965	508
