

Light Reflectance Value (LRV) indicates the amount of visible light reflected by a surface material's color. When illuminated, different colors of different materials reflect or absorb unique quantities of light. These quantities are measured using a spectrophotometer, and the LRV is determined.

The following charts show the LRVs for our Epoxy worksurface material color offerings.

EPOXY	LRV
BLACK ONYX	6.0
GRAPHITE	13.0
GRAY	32.0
LUNAR WHITE	56.0
ALPINE WHITE	79.9
BRONZE	11.6
DARK KHAKI	15.0
FOREST GREEN	7.3
IVORY	57.2
PEARL	45.3
PEWTER	31.9
PLATINUM	18.3
SAND	50.7
STEEL BLUE	22.7
TAN	41.0
