- Largest custom fabricator of lab worksurfaces in the world
- Fabricated pieces - 7,000+ per week
- Epoxy slabs produced - 7M+ sq ft per year
- Manufacturing locations - 3
- Employees - 400
- Countries - 50
- Global sales offices – 6
- Annual shipments – 22,000

Benefits of Centralized Fabrication

- Become part of the Wilsonart family
- Leverage our financial strength as one of your advantages
- Reduce your supply chain costs and increase efficiency
- Centralize all fab orders with one point of contact for all outlets
- No more juggling between multiple different shops and locations

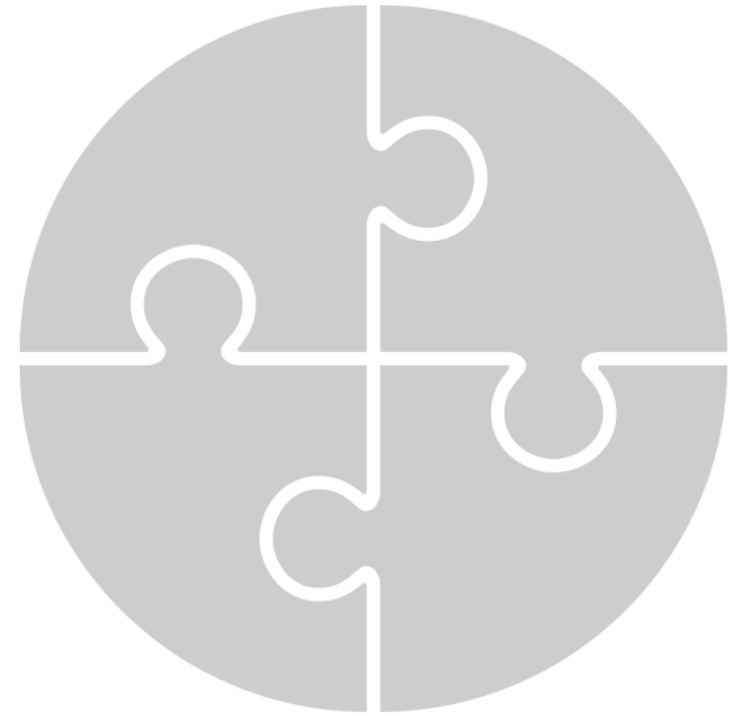

Capacity | Size | Experience

- Ability to handle multiple projects with multiple phases directly to jobsites
- Decades of experience managing a wide range of small to multimillion-dollar projects
- Custom finishing in multiple materials:
 - Routing & cutting
 - Special edge finishing
 - Custom designs
- Teams of experts in Engineering, Estimating, Drafting and Customer Support
- On-site installation support

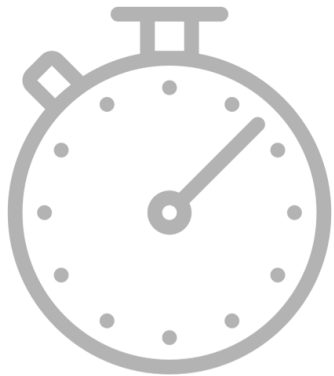

Complete Solutions Provider

- Complete solutions provider of multiple surfaces for your entire project
- Both manufacturer and fabricator
 - No more BYOM - “Bring Your Own Material”
 - Cut out the middleman to increase your profit
 - Fewer chances for communication errors
- One-stop shop for ordering and receiving fabricated surfaces

Increase Your Productivity

- Receive ready-to-install custom fabricated jobs - complete with truck drawings - delivered directly to your jobsite to keep you on time and under budget
- Durcon Fab excels on large projects, when smaller shops may not have the finances nor the capacity to handle larger jobs
- In fact, the larger the job – the more sense it makes to use Durcon Fab!
